

Repeater

Wireless device to extend network coverage and ensure connectivity in installations with limited coverage.

- + Expands communication network coverage.
- + Easy installation.
- + Low power consumption.
- + Forwards data to the SIGFOX network or to the Master GW to ensure connectivity.

TECHNICAL SPECIFICATIONS

Capacity	140 transmissions per day when using the SIGFOX network.
Range	Up to 300m with direct line of sight.
Protocols	SIGFOX.
Power Supply	3.6V 19AH battery.
Dimensions	145x91x56 mm.
Communication	Radiofrequency, at 869MHz or 922 MHz, depending on the country legislation.

INSTALLATION

- The repeater should be installed outdoors, in an open area without obstacles, to ensure optimal coverage and a stable connection with the master system.
-
